

NETTLEBANK FIXINGS

EZY-FIX-HOLLOWTUBE ANCHOR

A hollow two piece anchor system which is accredited for memorials up to 3ft high, for memorials above 3ft high 2 anchors should be used.

The Ezy-Fix anchor system is a stainless steel tube with a 50mm washer attached to the top of the tube which is to be driven into the ground through the top of the foundation base/bases, until the washer sits flush with the top of the foundation base.

A fully adjustable Ezy-Fix top can then be adjusted to the required thickness of the memorial base and located into the top of the tube to complete the anchor system.

WE SUPPLY EZY-FIX IN 4 DIFFERENT LENGTHS OF TUBE

- 1M/900MM** For memorials fixed on very sloping ground or on very soft, sandy ground conditions. Also memorials above 3ft high.
- 600MM** For memorials up to 3ft high and two for memorials up to 4ft high.
- 350MM** For memorials that are fixed onto a foundation base on a pre-poured concrete beam/raft.
- 250MM** For memorials that are fixed directly onto the pre-poured concrete beam/raft.

WE SUPPLY EZY-FIX ADJUSTABLE TOPS IN 2 LENGTHS AND 3 DIAMETERS

26MM Diameter for **28MM** hole in memorial base

28MM Diameter for **30MM** hole in memorial base

38MM Diameter for **40MM** hole in memorial base

7 INCH/180MM for up to **4 INCH** memorial base

10 INCH/250MM for up to **7 INCH** memorial base and also **remedial work** (secondary dowelling)

PREPARATION

Pre-drill the required ground anchor hole in the required position of the foundation base, and memorial base, making sure they align. If using a sub base this should correspond also. **SEE TABLE FOR RELEVANT HOLE SIZES**
