

NETTLEBANK FIXINGS
OLD STYLE HOLLOW ANCHOR SYSTEM

A hollow one piece ground anchor system which is accredited for memorials up to 3ft high, for memorials up to 4ft 2 anchors should be used.

The old style hollow anchor system is a stainless steel tube with a 50mm washer on and two rivets placed on each side of the tube at 2¾ inches/70mm from the top of the anchor.

WE SUPPLY THE OLD STYLE HOLLOW ANCHOR IN 3 DIFFERENT LENGTHS

600MM For memorials up to 3ft high.

350MM For memorials that are fixed onto a foundation slab onto a pre-poured concrete beam/raft up to

250MM For memorials that are fixed directly onto a pre-poured concrete beam/raft up to

Maximum hole size in memorial base is **28MM** dia

Maximum hole size in foundation base is **30MM** dia

PREPARATION

Pre-drill the required/correct ground anchor hole in the required/correct position of the foundation base and memorial base, making sure they correspond/line up together. If using a sub-base this should correspond/line up also.

<u>MAXIMUM DIA HOLE IN MEMORIAL BASE</u>	<u>MAXIMUM DIA HOLE IN FOUNDATION BASE/RAFT</u>
28mm	30mm

INSTALLATION

Place foundation base in appropriate position on the grave space and in line, mark around the base with a spade, move base and remove turf/soil to the correct depth and making sure it is level.

If fixing on a pre-poured beam/raft drill the correct hole in the correct position to correspond with the hole in your memorial base/foundation base. If a sub-base is required place the anchor through the top of the foundation base and into the raft/beam.
